

# DataSheet

Wheeled extinguishers are designed for tackling large fires. Their huge capacity ensures a longer discharge time and higher rate of discharge than standard portable fire extinguishers, whilst the high quality trolley frames make the units easy to handle and enable fast deployment.

**COMMANDER**

## WHEELED EXTINGUISHERS

### CO<sub>2</sub> Trolley Units

Available in both 10kg and 20kg, this unit combines high performance with compact dimensions. Ideal for significant flammable liquid fire risks and live electrical equipment risks, the extinguisher is easy to handle and operate.

### Foam Trolley Units

AFF Foam trolley units are designed to cope with large Class A and Class B fires - for example fuel stations, large warehouses and manufacturing plants. Despite their size they are designed to be quickly moved and easily operated with one person.

### Powder Trolley Units

Powder trolley units are tremendously effective, and their unsurpassed knock-down ability combined with the large capacity makes them suited for multi-class fire risks, for example large fuel stations, large manufacturing plants and heavy industry. They are robust and designed for a long service life.

Technical Specification	WFC10	WFC20	WFF50	WFP50	WFF100
Capacity	10kg	20kg	50ltr	50kg	100ltr
Extinguishing Medium	Carbon Dioxide	Carbon Dioxide	AFF Foam	ABC Powder	AFF Foam
Discharge Time	45s	75s	60s	41s	≥40s

### PRODUCT CODE

WFC10 | WFC20 | WFF50 | WFP50 | WFF100

### PRODUCT GROUP

Wheeled Extinguishers

### DIMENSIONS (mm) (height x diameter)

WFC10: 1180 x 340  
 WFC20: 1380 x 750  
 WFF50: 1120 x 600  
 WFP50: 1120 x 610  
 WFF100: 1065 x 400

### WEIGHT

WFC10: 33kg  
 WFC20: 85kg  
 WFF50: 80kg  
 WFP50: 80kg  
 WFF100: 150kg

- Extremely portable and easy to handle
- High quality construction ensures a long service life
- Corrosion-resistant finish 5-year warranty
